Intensity Lens Distance and Details

Far

With clear distance vision

- I can't believe it! This morning I spotted my friend in a crowd.
- I love being able to watch TV from my sofa.
- It's been years since I could drive without glasses.

Intermediate

With enhanced intermediate vision

- Everything on the dashboard looks so sharp! I feel much safer driving now.
- Now that I can see the keyboard clearly, I can keep in touch with my kids overseas.
- I feel so young, reading a menu and ordering without glasses.

Near

With excellent near vision

- I thought about buying a larger phone. Now I don't need to.
- Reading a book isn't tiring anymore.
- My wife took up painting again after all these years.

Vision Redefined

Were you diagnosed with cataract? It can be treated! Imagine the joy of being able to see your loved ones clearly again.

Cataract usually develops slowly over time, effecting one or both eyes. Aging, eye injuries or diseases such as diabetes are just some of the causes.

With healthy eyes, the lens focuses the light on the retina - creating a clear natural image.

With cataract, the eye lens becomes cloudy and less light gets through. As a result, people with cataract often experience unclear vision and decreased quality of life.

Common symptoms

Blurred images

Glare

Faded colors

Double vision

Frequent prescription changes

Poor night vision

Your cataract can be treated!

Today, cataract surgery is **fast, simple and effective** and can even be performed as an outpatient.

The surgery involves removing the cloudy lens and replacing it with an intraocular lens (IOL).

IOLs are cutting-edge artificial lenses made from soft acrylic material implanted in the eye by your surgeon through a tiny microincision.

Once inserted in the eye, the IOL replaces your focusing power that was lost due to the cataract, restoring your vision.

Rediscover your sight. Live your best life

Hanita Lenses is a worldwide trusted manufacturer and provider of intraocular lens solutions for cataract surgery. With more than 40 years of experience in meeting the varied needs of ophthalmic surgeons, the Hanita Lenses name is synonymous with high quality, reliability and service.

Intensity provides you with:

- ✓ Intensified vision
- ✓ Far, intermediate and near visual acuity
- ✓ Ability to perform a full range of daily activities

Ask your doctor for Intensity and start enjoying life again!

* Available as preloaded

INNOVATION

IN-SIGHT-FUL unique technological solutions

EXPERTISE

Pushing the limits of intraocular implants for over 40 years

PARTNERSHIP

Advancing patient care through our partners in 40 countries

QUALITY

Developed in our state-of-the-art labs and manufactured to the highest quality standards

RELIABLE

Providing solutions based on strong clinical research and excellent user experience

TRANSPARENT

We believe that everyone deserves to see the world's beauty
